Theme No. 265 : Findings of Forensic Scrutiny- Guidelines for Prevention of Frauds

A well informed customer will make the policy makers as well as organisations which produce goods and services more responsive to the customer needs. This will also result in healthy competition among organisations and improve the quality of goods and services produced.

The “SIB Students’ Economic Forum” is designed to kindle interest in economic affairs in the minds of our younger generation. We highlight one theme in every monthly meeting of the “Forum”. In the recent past, RBI had conducted forensic scrutiny at certain identified banks due to occurrence of large value frauds or sharp increase in number of frauds at such banks. This month we discuss on the findings of forensic scrutiny.

What was the major intention to undertake the scrutiny?

As already mentioned, the scrutiny was conducted at certain banks, where there was a sharp increase in number of frauds and that too of large values. The scrutiny was undertaken to primarily identify the policy gaps, if any, and adequacy of controls. During the scrutiny, systemic factors were also sought to be identified. Based on the findings of the scrutiny, further study has been made across banks to ascertain the policy and operating framework in place for detection, reporting and monitoring of frauds as also the surveillance/ oversight process in operation so as to prevent the perpetration of frauds. The study has shown that while the banks do have certain policies and processes in this regard, they are not well structured and systematic to ensure proper focus on typical fraud events. Besides, there is lack of consistency in treatment of such transactions having characteristics of fraud as also in their reporting to the “Competent Authority”. Banks are, therefore, advised by RBI to suitably modify their policy and streamline the operating framework keeping in view certain indicative guidelines set out below:

Which were the major areas identified showing recurrence or rising trend in the reported cases of fraud?

The major areas prone to large value frauds were identified as

1. Loans/ advances against hypothecation of stocks
2. Housing loans cases
3. Submission of forged documents including letters of credit
4. Escalation of overall cost of the property to obtain higher loan amount
5. Over valuation of mortgaged properties at the time of sanction

6. Grant of loans against forged FDRs
7. Over-invoicing of export bills resulting in concessional bank finance , exemptions from various duties etc
8. Frauds stemming from housekeeping deficiencies

The above list is only illustrative and not exhaustive. The banks need to introduce closer monitoring and tighter controls in the above areas, as also in other such areas where there is typically certain degree of concentration of occurrence.

Which are the three tracks in the operating frame work for dealing with frauds?

The operating framework for tracking frauds and dealing with them should be structured along the following three tracks:

- Detection and reporting of frauds
- Corrective action and
- Preventive and punitive action

What are the procedures to be followed in detecting and reporting frauds?

The banks should have a set of prescribed procedures and criteria with which the events or transactions having serious irregularities are analysed and assessed to establish occurrence of fraud. For this purpose, the banks may define a ‘fraud’ based on the guidelines issued by RBI. While doing so, they may clearly demarcate/ distinguish the occurrence of an event on account of negligence ‘in conduct of duty’ from ‘collusion’ by the bank staff (with the borrowers and with an intention to cheat the bank). Further, care may be exercised while dealing with instances of ‘wilful default’.

How do banks identify wilful default?

Generally banks consider that a wilful default would be deemed to have occurred if any of the following events is noted.

1. The unit has defaulted in meeting its payment / repayment obligations to the lender even when it has the capacity to honour the said obligations.
2. The unit has defaulted in meeting its payment / repayment obligations to the lender and has not utilised the finance from the lender for the specific purposes for which finance was availed of but has diverted the funds for other purposes.
3. The unit has defaulted in meeting its payment / repayment obligations to the lender and has siphoned off the funds so that the funds have not been utilised for the specific purpose for which finance was availed of, nor are the funds available with the unit in the form of other assets.
4. The unit has defaulted in meeting its payment / repayment obligations to the lender and has also disposed off or removed the movable fixed assets or immovable property for the purpose of securing a term loan without the knowledge of the bank / lender.
5. Further, the banks may also examine the “intent” to defraud, irrespective of whether or not actual loss takes place. Keeping these key factors in mind, any action taken in collusion to derive undue/ unjust benefit or advantage should be termed as fraud.

How do they report the fraud?

Following such a protocol of identification, once a fraud is detected, a report must be prepared and submitted to the “Competent Authority”. As a part of their overall policy and operating framework, the banks should identify and designate the Competent Authority to whom such reports should be submitted. The fraud report should be a diagnostic assessment, clearly bringing out the causes of the fraud and identify whether the fraud occurred due to ‘system failure’ or ‘human failure’.

How do banks take corrective action?

An important corrective step in a fraud is recovery of the amount siphoned off through the fraud. Often, during course of investigation and enquiry into the events/ transactions, the need to track the flow of defrauded amount does not get due priority or the exercise undertaken in that direction does not lead to material results. This may be primarily attributable to the following:

- The lack of ability on the part of the operating staff to sift through the layered/ interlocked transactions, to determine the ultimate destination of the defrauded amounts and to track the investment of the amounts in assets/ properties and/ or use of the amounts for the expenditures.
- In case where the operating staff is not in a position to do it, because of complexities involved, considerable time is spent in undertaking this type of investigation and often the task is completed in a routine manner.

How do banks proceed in dealing with the fraud?

A structured scrutiny/ examination of events or transactions would lead to quick conclusion whether a fraud has occurred and the bank’s funds have been siphoned off. Therefore, this exercise is the first critical step towards corrective action in the sense that it would lead to expeditious filing of police complaints, blocking/ freezing of accounts and salvaging funds from the blocked/ frozen accounts in due course. Besides, once a set of transactions is explicitly identified as fraudulent, the mandate for seizing and taking possession of related documents, issuance of suspension order/ order to proceed on leave,to identified/ suspected employees would be easier thereby preventing them from destroying/ manipulating evidences or obstruction of investigations. Banks have already been advised that they should provide singular focus on the “Fraud Prevention and Management Function” to enable among others, effective investigation in fraud cases and prompt as well as accurate reporting of fraud cases to appropriate regulatory and law enforcement agencies.

How do banks undertake preventive and punitive action?

As per the diagnostic analysis, preventive action as deemed necessary to address the ‘system failure’ and/ or punitive action as prescribed internally for ‘human failure’ should be initiated immediately and completed expeditiously. Generally, in the current system driven environment in banks, wherever transactions occur in breach of/ overriding

“Controls”, they get reflected in the “end of day exception report”. Accordingly, all such *exception reports* should be perused by the designated officials and a post facto authorization for the transactions accorded. However, it has been observed in certain cases that the process often does not get duly implemented reflecting the poor internal control mechanisms. Therefore, banks should ensure that they bring in the needed refinement in this process and also specify the levels/ authority to whom the exception reports will be invariably submitted and the manner in which the authority will deal with the exception reports. The entire gamut of the manner in which the exception reports are generated, transactions contained in the reports are examined/ scrutinised, and the reports submitted to higher authorities for necessary authorizations for breaches should be periodically subjected to review and oversight by the bank’s management/ Board of Directors.

What are the major steps to be taken by banks in the fraud risk management framework?

Banks should immediately take steps to put in place following controls and disincentives in their HR processes and internal inspection/ audit processes as part of their fraud risk management framework:

1. For key and sensitive posts such as those in dealing rooms, treasury, relationship managers for high value customers, heads of specialized branches, etc. the banks should select only such officers who satisfy the “Fit and Proper” criteria. For the purpose, the banks should draw up a list of critical as well as sensitive positions or areas of operation and evolve well defined “Fit and Proper” criteria for applying them to determine the suitability of the staff/ officers to those posts/ areas of operations. The appropriateness of such postings should be subjected to periodical review.
2. The banks should immediately put in place “staff rotation” policy and policy for “mandatory leave” for staff. The internal auditors as also the concurrent auditors must be specifically required to examine the implementation of these policies and point out instances of breaches irrespective of apparent justifications for non-compliance, if any. The decisions taken / transactions effected by officers and staff not rotated/ availing leave as per policy should be subjected to comprehensive examination by the internal auditors/ inspectors including concurrent auditors. The findings thereon should be documented in a separate section of the audit/ inspection reports.
3. The banks should build up a database of officers/ staff identified as those having aptitude for investigation, data analysis, forensic analysis, etc. and expose them to appropriate training in investigations and forensic audit. For investigation of frauds, only such officers/ staff should be deployed through the “fraud investigation unit/ outfit”.

SELECT LIST OF RBI CIRCULARS:

Date	Reference Number	Subject
April 29,2011	DBS.CO.ITC.BC.No.6/31.02.0008/2010-11	Working Group on Information Security, Electronic Banking, Technology Risk management and Cyber Frauds
